Brac Water Sanitation and Hygiene Programme Proposal: Ensuring Sustainable Access to Clean Water and Improved Hygiene

The **Brac Water Sanitation and Hygiene Programme Proposal** aims to address critical public health challenges related to water quality, sanitation, and hygiene practices in vulnerable communities. With increasing urbanization, climate change impacts, and population growth, access to safe water and sanitation remains a pressing issue in many developing regions. This comprehensive proposal outlines strategic interventions designed to foster sustainable development, improve health outcomes, and empower communities to maintain long-term improvements in water and hygiene services.

Understanding the Context and Importance of Water, Sanitation, and Hygiene (WASH)

Global and Local Challenges in WASH

- Over 2 billion people worldwide lack access to safely managed drinking water services.
- Approximately 4.2 billion people do not have safely managed sanitation facilities.
- Waterborne diseases are among the leading causes of morbidity and mortality, particularly among children under five.
- Inadequate hygiene practices contribute to the spread of infections and undermine overall community health.

Impact of Poor WASH Facilities

- Increased incidence of cholera, dysentery, typhoid, and diarrhea.
- Reduced school attendance, especially among girls due to lack of sanitation facilities.
- Economic burden on families and health systems due to disease management.
- Environmental degradation from improper waste disposal and water contamination.
